# StoneLux®

THE LOOK, FEEL & QUALITY OF NATURAL BRICK

### Brick Repair Filler

A multi purpose, natural brick finish, interior or exterior filler.

Not like your normal everyday multi purpose filler, StoneLux Brick Repair Filler has been specially formulated to create the natural look of bricks, brick shades and brick texture.

Water based and easy to apply in simple and quick application. Can be used on various surfaces.

## Quality for Less

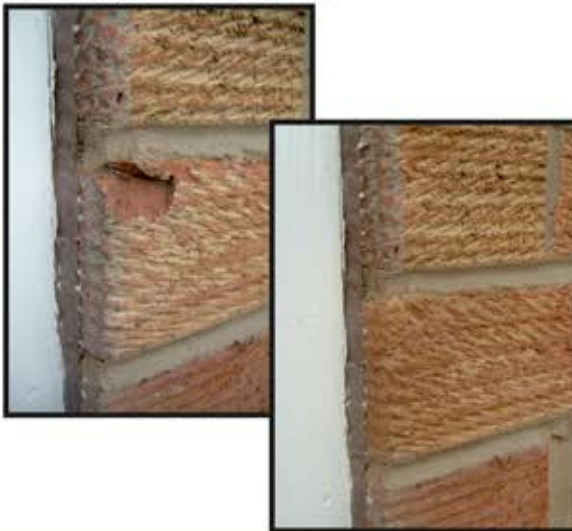

Damaged Brick - Before Repair

Damaged Brick - After Repair

A high-performance multi purpose filler providing a cost effective alternative to replacing damaged bricks.

## Benefits

### Authentic

Our unique and exclusive ground stone formulation gives you a truly authentic brick finish which looks and feels like natural and original bricks.

### Durable

Gives a decorative, hard-wearing and weather resistant, stone effect finish.

### Quick

Easy to apply using trowel or small tool. Simply use straight from the tub.

### Cost Effective

A cost effective alternative to replacement bricks. All the benefits of new bricks without the cost or mess.

### Environmentally Friendly

Environmentally friendly. Waterbased. Low VOC, virtually odourless. Simply cleans brushes with water.

## Buy Now

All products are available to purchase online at [www.charlesproducts.co.uk](http://www.charlesproducts.co.uk) or by calling us direct on 01405 720281.

## Easy to Use

### **Step 1: Remove the flaky and soft parts of the brick!**

Simply clean off all the loose parts of the damaged/worn brick using a wire brush, making sure that it is free from all dust and dirt. Using a small soft bristled brush apply the stabiliser to the damaged part of the brick only and leave to become dry or tacky.

### **Step 2: The replacement of the brick face!**

Once the stabiliser is tacky or dry, mask off the surrounding mortar joint before trowelling on the StoneLux Brick Repair Filler making sure to reform the face level with the surface of the surrounding brickwork and reform the surface to match the shape and type of the original brick. If the damage is more than 12mm in depth, you can either apply several coats of the Brick Repair Filler, filling only 12mm at a time, leaving between 12-24 hours after each coat. Or you can use an appropriate 2 pack filler to leave 5mm-10mm in depth to then apply the Brick Repair Filler over the top. Once this has been done to your satisfaction you can then peel off the masking tape and continue to Step 3.

### **Step 3: Finishing Up!**

Now you may need to shape the repaired area by placing the small spirit level or straight edge near the face of the repair and using your pointing trowel or small tool cut the edges to form the brick back to its original size and shape.
