Before Using Brick Repair Filler

After Using Brick Repair Filler

Brick Repair Filler

BRICK REPAIR FILLER

A Natural Brick Finish Interior & Exterior Filler

A water-based brick filler specially designed to recreate the natural appearance of bricks. Ideal for repairing damaged brickwork.

Our ready mixed, quick drying formula, makes it quick and easy for you to repair cracks, chips, drill holes and other types of brick damage.

Long-lasting Professional Brick Repairs

StoneLux Brick Repair Filler is available in 9 ready-mixed common brick colours, to help you achieve an almost invisible repair. Our unique textured formulation contains ground stone, to give you a truly authentic brick finish that looks and feels like the original brickwork.

Our Brick Filler is hard wearing, weather resistant and UV stable to give you a long-lasting brick repair.

Quick & Cost Effective

Use straight from the tub, for a quicker and significantly cheaper alternative to replacing damaged bricks.

What our customers say:

"Excellent alternative to grinding out and replacing single bricks. Everything holds well and the resulting surface is absolutely brick-like"

- Anonymous on 17 July 2017
